

PAPYRUS SOFTWARE

# BUILDING LIVING APPLICATIONS IN SPEED AND SCALE

Papyrus Converse is a cutting-edge **AI-powered no-code** platform designed to revolutionize business process management (BPM). By eliminating the need for programming, we empower organizations to rapidly develop and deploy custom applications, automating complex processes and driving significant efficiencies.

Don't let complex processes slow you down. Papyrus Converse ensures **unparalleled time-to-market** and enables companies to quickly develop and deploy applications for business value streams. The Conversational UI and Natural Language Definition (NLP) enable even less tech-savvy users to manage complex and dynamic workflows.

Integrated **Process Mining** capabilities enables businesses to identify inefficiencies, streamline workflows, be agile and transparent to improve overall performance. By leveraging generative AI (Watsonx), Papyrus Converse provides additional insights (**Document Mining**) and capabilities. Cross functional teams are empowered to build 'Living Applications' avoiding legacy code and allowing for continuous adaptation and improvements of the business process.

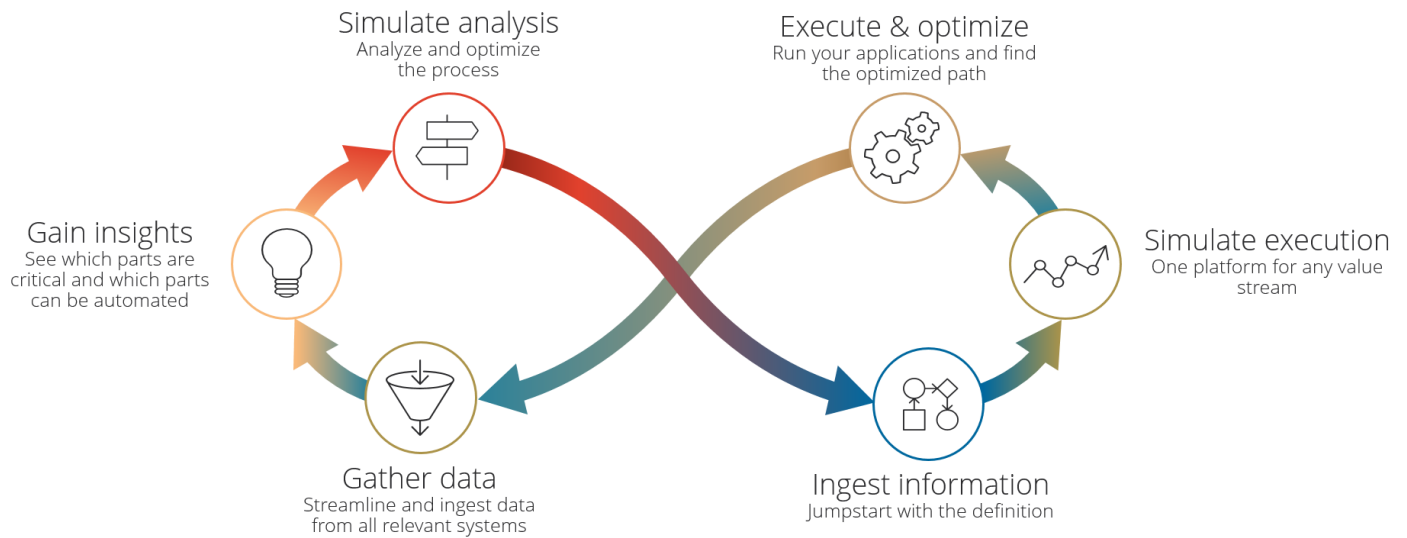

## CORE COMPETENCIES

- AI-Powered No-Code Platform
- Process Automation and Optimization
- Integration with Leading Technologies
- Business Process Management
- Document Mining

## KEY DIFFERENTIATORS

- Unprecedented Speed
- Natural Language Definition
- Flexibility and Adaptability
- Powered by AI
- Living Applications

# A NEW PARADIGM

Papyrus Converse is a comprehensive cross industry solution for managing and optimizing your business processes. We specialize in complex processes to improve transparency, agility and efficiency and reduce costs. By identifying and eliminating bottlenecks, we help organizations enhance performance and productivity. Our platform leverages the power of IBM Watsonx and Process Mining to provide advanced analytics and insights, enabling data-driven decision-making.

## COMPETITIVE ADVANTAGES

**Unparalleled Time-to-Market:** Papyrus Converse offers a significantly faster development process compared to traditional BPM tools, allowing organizations to bring new applications to market more quickly.

**Natural Language Definition:** The ability to define processes in plain language makes Papyrus Converse more accessible to non-technical users, reducing the need for specialized IT resources.

**Flexibility and Adaptability:** The platform's ability to handle complex and dynamic processes, along with its support for continuous adaptation and improvement, differentiates it from rigid BPM solutions.

**Integration with Leading Technologies:** Papyrus Converse's integration with IBM Watsonx and Process Mining provides access to advanced AI and analytics capabilities, enhancing its value proposition.

**Living Applications:** The concept of "living applications" that can be continuously adapted and optimized based on real-time data is a unique feature that sets Papyrus Converse apart.

## EMPOWER YOUR BUSINESS, ACHIEVE YOUR GOALS

By embracing tools like Papyrus Converse that empower business users, organizations can become more adaptive and agile in achieving their strategic goals. Our business-aligned paradigm helps drive successful automation and creates a foundation for an adaptable digitized business. By empowering your business users, you'll gain a competitive advantage, increase efficiency, and reduce costs. Act now to accelerate your success.

- Respond to an increasingly dynamic environment at speed.
- Achieve strategic priorities through business empowerment, efficiency, and low total cost of application development.
- Become more responsive, self-serve your needs, and execute your ideas in a fraction of cost and time.
