

For over 30 years, Papyrus Software has been the market leader with its standard business communication and process management software, leading implementation for more than 2000 major companies and service providers. Our success is based on our experienced professionals who excel in their dedication and commitment.

Software Engineer

The Italian branch of the ISIS Papyrus Group is looking for a Software Engineer to join its Development team based in Ivrea (Torino).

Key Responsibilities:

In a supportive and welcoming environment, the main activities are about design, creation and maintenance of software. All the aspects of the software life cycle are covered ranging from architecture to requirements, testing, refactoring and more.

Your profile:

- Good knowledge of one imperative language, like Java or C++
- Curiosity and willingness to learn
- Good English language, oral and written
- Some knowledge about object-oriented design

We offer:

- An immersive experience covering all the aspects of the software lifecycle, from conception to production to maintenance
- An agile and open organization, with fast iteration lifecycles and low process bureaucracy
- Ability to create innovative solutions, and have fun while at it.
