

PAPYRUS SOFTWARE

PAPYRUS CAPTURE: INTELLIGENT DOCUMENT
PROCESSING FOR THE MODERN BUSINESS

Automate all Your Inbound Mail Channels

Imagine a world where your organization effortlessly captures and understands mountains of documents, from emails and forms to social media posts and web content. Intelligent Document Processing (IDP) makes this a reality, transforming this unstructured chaos into a structured goldmine of valuable information.

- ◆ **One System:** Unify all your documents, emails, and data in a single, intelligent platform.
- ◆ **Effortless Capture:** No more manual data entry. Just scan, upload, and let IDP do the work.
- ◆ **Instant Insights:** Extract valuable information from any document in seconds.
- ◆ **Automate Everything:** Free up your team by automating tedious document processing tasks.

Intelligent Capture & Classification

Papyrus Capture isn't just about scanning documents. It's about unleashing their hidden potential. Our self-learning technology for continuous improvement recognizes anything you throw at it, from emails and invoices to social media posts and handwritten notes. Unlike traditional capture systems that struggle with different formats, Papyrus Capture is truly document-agnostic.

TRAIN ONCE, AUTOMATE FOREVER: INTELLIGENT DOCUMENT CLASSIFICATION

The screenshot displays the Papyrus Business Designer interface. On the left, there's a sidebar with 'Home' and 'Keyword editor - Confirmation'. The main area is divided into several sections: 'Document types' with a list of 'Insurance', 'Reclaim', and 'Confirmation'; 'Classification strategy' with 'Complete' and 'Train classification' buttons; 'Samples' table with columns for 'Sample', 'Detected type', 'For training', and 'For test'; 'Confirmation' section with 'Document types Confirmation' and 'Edit' button; and a 'Confirmation' table with columns for 'Sample', 'Detected type', 'For training', and 'For test'. On the right, there's a preview of a document titled 'GER_Papyrus_Insurance_Eva_Mills.pdf' showing a form with fields for 'Versicherungnehmer', 'Versichertes Fahrzeug', 'Versicherte Risiken', and 'Gesamtpremie'.

Stop sorting and routing documents and emails per hand. Papyrus Capture eliminates the tedious task of manual classification and frees humans from performing mundane and repetitive tasks. Our innovative AI self-learning technology gets smarter, continuously improving accuracy and adapting to your specific needs.

Effortless Training

Just feed Papyrus Capture a few examples of each document or image type. It analyzes them, identifying unique patterns and keywords.

Future-Proof Automation

As your document and content types evolve, Papyrus AI powered Capture is always learning and adapts seamlessly, ensuring consistent accuracy.

Smart Routing

Email, fax, scanner, portal, mobile – Papyrus Capture handles them all. It automatically sorts them so that the right documents reach the right people instantly.

Extract the Data That Matters Most

The more documents Papyrus Capture processes, the better it understands your needs, automatically refining its classification and extraction rules.

Beyond Classification: Intelligent Content Extraction

Our intelligent extraction technology unlocks the hidden value within your documents, automatically extracting critical data for seamless integration into your existing systems assisting humans with better access to high-value information that make a real difference in the performance of the organization.

Unstructured Information to Structured Data

Papyrus Capture transforms even the most complex documents - handwritten notes, invoices with varying tables and layouts, etc. - into clean, structured data.

Powerful Recognition

Our recognition is highly performant when identifying a wide range of content types, from free text in emails to checkboxes in forms, images, signatures and barcodes.

Intelligent Algorithms

Papyrus Capture uses pattern recognition, keywords, layout analysis, and more to extract the data you need with exceptional accuracy.

Revolutionize Document Digitization with Business-Driven Design and self-learning. Papyrus Business Designer - Capture is a game-changer for document processing supporting business capture and OCR needs during content and case management operations. This AI powered innovative tool empowers your users extracting and indexing documents and lifting fields from arbitrary documents on the fly.

Simply drag and drop the data fields you need, and the system does the rest. Automatic keyword classification and intelligent pattern recognition handle both structured and unstructured documents. Plus, the system learns from your actions, achieving up to 98% automation for unstructured communication and near-perfect accuracy for structured documents.

BENEFITS YOU CAN MEASURE

-  **Faster Processing**
Automate data extraction and eliminate manual keying delays.
-  **Reduced Errors**
Ensure data accuracy with Papyrus Capture's intelligent algorithms.
-  **Improved Efficiency**
Free your team from tedious data entry tasks and empower them for higher-value work.
-  **Streamlined Workflows**
Save costs and improve the overall quality of service (QoS)

Papyrus Intelligent Document Processing (IDP) is an integral part of the Papyrus Digital Experience Platform, automating your entire bi-directional business communication journey. From initial requests to completion, everything happens in one user-friendly environment, orchestrated in Business Value Streams.

- ◆ **Automated Processing:** Intelligent machine learning handles repetitive tasks, freeing up your team's time.
- ◆ **Bidirectional Communication:** Information flows smoothly between systems, processes and users.
- ◆ **Collaborative Work:** Teams can easily collaborate on content and documents within the platform.
- ◆ **Reporting & Auditing:** Track progress and ensure compliance with the platform's reporting capability.
- ◆ **Powerful Integration:** Connects seamlessly with any business system, infrastructure and back-office users.
